

WHAT IS A MEXIKID?

It's not what you think. Mexikid is not Meximan's sidekick!

(Although...note to self: new comic book idea— The Amazing Meximan!).

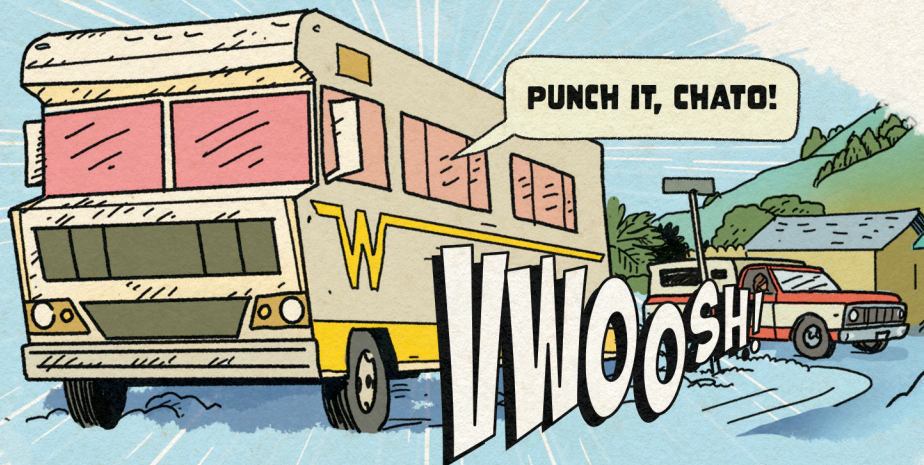

Mexikid is what I call a myself. A first generation American-born kid of Mexican parents. Two feet planted on the American side while one heart belonging to both sides of the border.

I had always struggled with being a kid of two worlds...

So I thought I'd take my readers on the trip that helped me better understand: Was I Peter or Pedro or both?

This graphic memoir recounts the time my parents crammed my eight brothers and sisters and I into a preowned motorhome and pickup truck with ropes for seatbelts for the road trip of a lifetime.

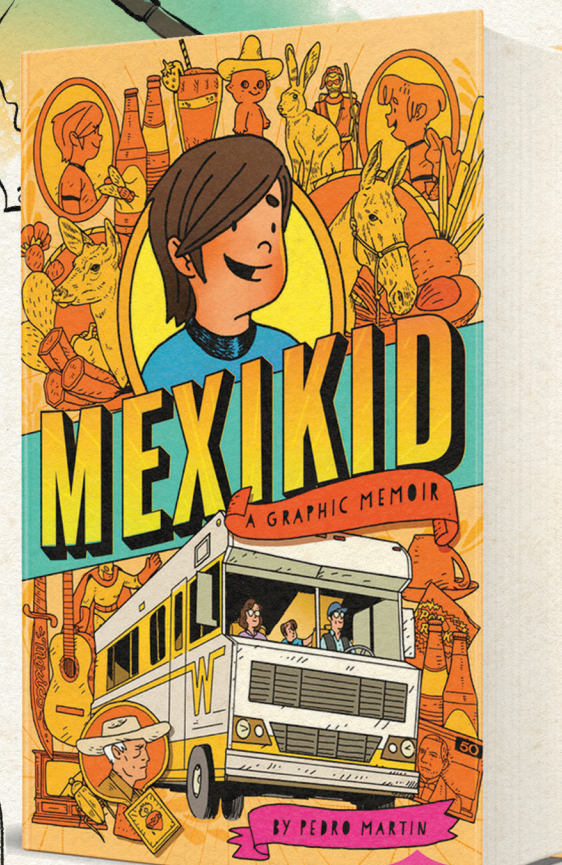

We traveled two thousand miles to Mexico get my Mexican-Revolution-era abuelito and bring him to the United States to live with us.

It's a funny, tragic, and sometimes historical adventure about a kid, me, trying to understand his heritage while attempting to connect with a **VERY STERN, SUPER-OLD, MAN OF MYSTERY.**

I've always loved comics because the visual elements add so much to the story and a story this big needed a lot of action sequences, historical guides and many, many bottles of Mexican sodas to tell!

Believe me, readers won't be able to stop burping with excitement!
